

South Burnett Flood Damage 2012/13

The South Burnett has been denied, at this stage, from being a Category C disaster area. Other areas such as Gympie, North Burnett and Bundaberg have qualified.

Cat C means an increased level of assistance to flood affected farmers and businesses. We need to demonstrate that many farmers in the South Burnett have suffered significant crop, soil and infrastructure damage. The areas of concern are along the creek and river flats of Barkers, Barambah, Stuart and Boyne Rivers and their tributaries.

To provide a case to government we need a reasonably reliable economic assessment of the losses. It would help us greatly if you could give us a guide so that we can make a good case. Your information will be treated confidentially and may only be used as "Farmer A".

Stock Losses: number and type of animals;

Infrastructure: e.g. houses, sheds, fences, yards, pumps, bores, mains lines, tanks, irrigation equipment, tracks etc;

Machinery: e.g. tractors, bailers, tools etc;

Crops: e.g. seed, fertiliser, established crops, hay losses etc;

Soil erosion and deposition: e.g. creek bank damage, scouring, subsidence, landslips, trees uprooted, dumping of sand, gravel, rock etc.
