

# AgForce coordinated pest animal control meeting

**Want to know how you can control wild dogs, feral pigs, rabbits and foxes?**

Don't miss out on vital information about how you can get involved in a community strategy for controlling feral animals in your region.

**Where:** Kumbia Hall

**When:** Wednesday 1 May, 10am - 3pm

**Speakers and topics include:**

- Dr David Berman, Pest Animal Research Centre outlining techniques for controlling rabbits
- AgForce Projects pest animal coordinator Damien Ferguson providing an overview of feral pig control including techniques and programs
- Information about baiting techniques and a wild dog trapping demonstration

Lunch & smoke provided

I'm not affected  
by feral animals,  
so why should I  
come along?

In fact, feral pests have a negative impact on the whole community, affecting not only agriculture, but natural biodiversity and the economic viability of local businesses.

Even if feral animals don't directly impact your property, they may be travelling across your land so you need to be involved in a community control program. Research has proven that the only way to effectively tackle this community issue is to have all landowners involved in a strategic, coordinated and district-wide approach to feral pest control.

*This project is delivered by AgForce Projects with the financial support of the Australian Government's Caring for Our Country initiative.*
